

This is an exploration in order to discover the potentiality of corrugated card board as a container for sugar portions. The definitive packaging would be made out of a single sheet or a small sachet. It is clearly a conceptual exploration as neither health nor productionissues had been considered.

## Properties list:

single product identity by modular structure identity by shape new product confectionery and sweetness dispensing systems pouch cardboard and paper contemporary opaque end-user packaging identity by typography information about content disposable packaging ready to use
