

HEALTHY TRASH

Properties list:

packaging as a new medium
end-user packaging
range of products
extra-use of packaging
concept
fruit and vegetables
juices
tube
can and tin
flow-pack
plastics
metals
cardboard and paper
ironic
mass-market
unusual visual association
identity by system of colour
identity by colour

The project starts from the analysis of the so-called "trash food" products, their attractive language and their visual codes typical of the contemporaneity. The objective is to communicate healthy foods, through a process of resemantization, using the codes of "trash". The product is intended as a provocation for the consumer, in order to activate and recall a more conscious approach at the moment of choice and purchase.
