

FLOPDA

Properties list:

product accessibility
single product
end-user packaging
concept
other food
frozen food
desserts and ice-creams
dairy, eggs and cheese
opening and closure systems
jar and pot
plastics
cardboard and paper
identity by shape

Flopda is a versatile and easy to open package. Flopda ingeniously produces two functions with a exible material: sealing and closing force. However, large opening surfaces enable opening and closing the package using little force. Flopda's strength lies particularly in its re-closeability. Flopda is suitable for a variety of products, such as food spreads, take away foods, cheeses, jams, ice cream and frozen goods.
