

BIOFLOW-PACK

Properties list:

biodegradability and compostability
end-user packaging
new product
flow-pack
bio plastics

A fully biodegradable and compostable flow-pack that provides all the required specifications for packaging biscuits with a reduction of fossil base materials: high seal strength and integrity, high barrier to oxygen and water vapor. The packaging has been manufactured using a Cavanna energy saving packaging machine with ultrasonic technology. The compostable film consists of MaterBi® for Novamont and NatureFlex? NK from Innovia Films, printed and laminated by Sacchital.
