

Properties list:

- reusability
- range of products
- end-user packaging
- new product
- other non-food products
- box
- cardboard and paper
- identity by shape
- identity by modular structure
- identity by system of colour

Ecobox is meant to collect any kind of waste, each in the proper case: paper, plastic, glass, tins, garbage. It is the key to recycling and respect for nature: to each one goes its containers to differentiate the rubbish collection and to be more similar to the nature. Ecobox is a modular box composed of five hexagonal cases which can be easily and quickly assembled anyhow and anywhere.

Thanks to the customized crowner, it can be laid against the walls or hanged, and it can be seen even at a distance. The five cases are of progressive height for a perfect modularity: it is easy to understand where to throw what! Cases can be assembled according to your flavour and choice.
