- concept
- homecare products
- other shapes
- plastics
- contemporary
- high-tech
- unusual structural association
- identity by shape
- identity by system of colour
- arts and crafts
- logistic optimisation

Five detergent packages becomes a stool. This container for detergent can be re-used as a stool made up by 5 assembled units. At home or on the store shelf, the container is stored horizontally: this allows for very stable storage and creative and unique shelf arrangements. The handle is at the top of the container, long and wide for very easy grip. The weight is well distributed and the assembled stool is very practical and steady for different home and garden jobs.
