

FIASCO DECANTER

Properties list:

product accessibility
adults
retail packaging
end-user packaging
concept
wine
bottle
glass and ceramics
contemporary
unusual structural association
identity by shape

The project goal is to improve the perception of Chianti wine: it's an important Italian wine which is usually underestimated by consumers. The focus is to change the bad stereotype and shift the way it's perceived, highlighting its elegance and refinement; so, the flask actual shape fits to be hybridized with a decanter's format.

The rounded bottom allows the bottle rotation and the shape reminds a decanter, joining the flask of Chianti at the wine tasting experience-quality. Also, before the consumption moment the packaging allows the natural aeration.

The bottles are packaged in a 6 pieces cardboard secondary pack with an interlocking base that keeps the bottle tilted that becomes Exhibitor inclined bottles.

Project developed and selected for the international student competition "Remarkable Packagings & Alternatives" within the "Emballage" packaging exhibition (Paris, November 19-22, 2012).
