- contemporary
- photo to evoke
- identity by system of colour
- identity by colour
- end-user packaging
- packaging as a new medium

New work from Antoinette Padmore a packaging design graduate of FIT: "In the midst of the Haitian earthquake, I felt hopeless as to what I can do to help the people in need. I immediately thought nutritional aid for children, specifically for those in impoverished countries. Vitahelp is an emergency relief package containing all the nutrients the body needs to recover. I dedicate this to all those who were lost and those who are still in need of help."
