From Hattomonkey website: - There is a huge selection of "Hashi" hot sauces: a very hot "Halapenio", extremely hot "Habanero", unbearable hot sauce "Cayenne pepper", as well as wasabi and mustard. That special look #@\$#! was created just as soon as we tried this hot sauce at the studio.

Hattomonkey informal packaging design is hot and excited. This is not just a simple sauce on a store shelf, it shouts the same language you do "#@\$#!".
