

SCADENZE DA RISPETTARE

Properties list:

end-user packaging
information accessibility
range of products
dairy, eggs and cheese
concept
sachet
pouch
jar and pot
box
bottle
plastics
metals
glass and ceramics
cardboard and paper
information about content
minimal
contemporary
photo to evoke
identity by photo
identity by typography
identity by system of colour

The project came from the need to simplify and optimise the communication of the life span of fresh food products, while simultaneously conveying the concept of "short life span" as a positive value. "The best things in life don't last long ... we give them to to you every day". To emphasise the surplus value of shelf life compared to best before date a line of products was created where the minimum best before date became a distinctive trademark and an element of different packaging typologies. As well as simplifying the structure of packaging, photography was used to metaphorically recall the concept of "short life" through a series of evocative images portraying delicate gesture and moments of beauty (a footprint in the sand, a soap bubble, a butterfly, ecc). The shelf-life labeling associated with a dominant colour identity a temporal category and specific range of products, making them easier to recognise and to store in a fridge in a domestic environment.
